PROJECTS

KeepNotes — Full-Stack Notes App *(Spring Boot, JSP, Hibernate/JPA, MySQL)*
- Built a full-stack note-management application with user authentication and complete CRUD functionality.
- Designed the relational schema in MySQL and used Spring Data JPA for persistence and querying.
- Also rebuilt the same application using the MERN stack (React.js, Node.js, Express.js, MongoDB) to compare a JavaScript-based architecture against the Java/Spring implementation.

Doctor Appointment System *(Laravel, Blade, MySQL)*
- Built a clinic-management platform supporting patient booking, doctor scheduling, and admin oversight with role-based access control.

Movie Booking System *(Core PHP, MySQL, AJAX, Bootstrap)*
- Developed a movie-ticket booking platform with seat selection and separate user/admin panels, using AJAX for dynamic, no-reload updates.

VNews — Real-Time News App *(React.js, News API)*
- Built a React application that consumes a public News API to display real-time, category-filtered news.

Bus Booking System *(C, Structures, File Handling)*
- Built a console-based, menu-driven bus booking system in C using structures and file handling - supporting route search across Gujarat cities, seat booking, automatic fare calculation, and persistent booking history.

CERTIFICATIONS
