

SET-2

1. Create a GUI to input:
(Player Name, Team, Match ID, Runs Scored, Balls Faced, Wickets_Taken)
2. Store the data in a database.
3. Load data into a Pandas DataFrame.

(Hint: `df = pd.read_sql_query ("SQL Statement / query", conn)`)

4. Display:
 - Strike rate of each player.
 - Top 5 players based on runs
5. Plot:
 - Bar chart of total runs by player
 - Line graph for wickets taken by each player
