

Unit 4

1 MARK QUESTIONS (Very Short)

(Definition / One-liners)

1. What is Software Testing?
2. Why is software testing important?
3. Define Verification.
4. Define Validation.
5. What is STLC?
6. What is Unit Testing?
7. What is Integration Testing?
8. What is System Testing?
9. What is Acceptance Testing?
10. What is Manual Testing?
11. What is Automation Testing?
12. What is Functional Testing?
13. What is Non-Functional Testing?
14. What is Black-box Testing?
15. What is White-box Testing?
16. What is Grey-box Testing?
17. What is Boundary Value Analysis?
18. What is Equivalence Partitioning?
19. What is a Test Case?
20. What is a Test Plan?

✓ 3 MARK QUESTIONS (Short Explanation)

Basics

1. Explain Software Testing and its importance.
2. Differentiate between Verification and Validation.
3. Explain STLC phases briefly.
4. What is Qualification in software testing?

Testing Levels

5. Explain Unit Testing with example.
6. Explain Integration Testing.
7. Explain System Testing.
8. Explain Acceptance Testing.

Types of Testing

9. Differentiate Manual and Automation Testing.
10. Explain Functional and Non-functional Testing.

Techniques

11. Explain Black-box Testing.
12. Explain White-box Testing.
13. Explain Grey-box Testing.
14. Difference between Black-box and White-box Testing.

Test Case Design

15. Explain Boundary Value Analysis with example.
16. Explain Equivalence Partitioning with example.
17. How to write an effective test case?
18. What are the components of a test plan?

4 MARK QUESTIONS (Detailed Answer)

Fundamentals

1. Explain Software Testing in detail and why it is important.
2. Explain Verification vs Validation with examples.
3. Explain STLC (Software Testing Life Cycle) with diagram.
4. Explain Qualification process in software testing.

Testing Levels

5. Explain all levels of testing:
 - Unit
 - Integration
 - System
 - Acceptance

Types

6. Explain Manual Testing and Automation Testing in detail.
7. Explain Functional vs Non-functional Testing with examples.

Techniques

8. Explain Black-box, White-box and Grey-box testing in detail.
9. Compare all three testing techniques.

Test Case Design

10. Explain Boundary Value Analysis in detail with diagram/example.
11. Explain Equivalence Partitioning with suitable example.
12. Explain how to write effective Test Plan and Test Cases.
