

Unit 3

1 MARK QUESTIONS (Very Short)

(Definition / One-liners)

♦ Software Quality Assurance

1. What is Software Quality?
2. Define Software Quality Assurance (SQA).
3. What is Software Reliability?
4. What is a Formal Technical Review (FTR)?
5. What is the main objective of SQA?

♦ Quality Standards

6. What is ISO 9000?
7. What is CMM?
8. What is Six Sigma?
9. What does CMM stand for?
10. What is the purpose of quality standards?

♦ Software Maintenance

11. What is Software Maintenance?
12. Name any one type of maintenance.
13. What is Reverse Engineering?
14. What is Forward Engineering?
15. What is Re-engineering?

✓ 3 MARK QUESTIONS (Short Explanation)

♦ SQA & Quality

1. Explain Software Quality Assurance in brief.
2. What are the activities of SQA?
3. Explain Formal Technical Review (FTR).
4. What is Software Reliability? Explain briefly.
5. Difference between Quality Control and Quality Assurance.

♦ Standards

6. Explain ISO 9000 in brief.
7. Explain Capability Maturity Model (CMM).
8. What is Six Sigma? Explain its importance.
9. Compare ISO and CMM.
10. What is SQA Plan? Explain briefly.

♦ **Maintenance**

11. Explain types of Software Maintenance.
12. What is Corrective and Adaptive Maintenance?
13. Explain Reverse Engineering with example.
14. Explain Re-engineering.
15. Difference between Forward and Reverse Engineering.

✓ 4 MARK QUESTIONS (Detailed Answer)

♦ **SQA & Reviews**

1. Explain Software Quality Assurance with diagram.
2. Explain Formal Technical Review (FTR) process in detail.
3. Explain Software Reliability and its importance.
4. Explain SQA Plan with components.

♦ **Quality Standards**

5. Explain ISO 9000 standards in detail.
6. Explain CMM levels with diagram.
7. Explain Six Sigma methodology (DMAIC).
8. Compare ISO 9000, CMM and Six Sigma.

♦ **Software Maintenance**

9. Explain all types of Software Maintenance in detail.
 - Corrective
 - Adaptive
 - Perfective
 - Preventive
10. Explain Re-engineering process with steps.
11. Explain Reverse Engineering and Forward Engineering in detail.
12. Explain Software Maintenance process model.
